OBJECTIVE

Passionate and dedicated frontend developer with strong foundational skills in React.js, Javascript, Tailwind CSS, Node.js, Express.js, and MongoDB. I am eager to apply my skills in a professional setting and contribute to the development of robust, user-friendly web applications.

TECHNICAL SKILLS

React.js, Tailwind CSS, Javascript, Next.js. Express.js, Node.js, and MongoDB.

PROJECTS

❖ **Shelf Master** [Live side](#) [Client side](#) [Server side](#)

Overview:

Shelf Master is a library management system. The Library Management Website is a robust and user-friendly web application designed to streamline the administration and operation of a library.

Key features:

- **Category-Based Book Management:** Users can categorize books for easier organization and retrieval.
- **User-Specific Book Management:** Enables users to update and delete their book entries, ensuring personalized control.

Technology Used : React.js, Javascript, TailwindCSS, node.js, Express.js, MongoDB

❖ **Colorful Expression** [Live side](#) [Client side](#) [Server side](#)

Overview:

Colorful Expression is an art and craft store-based website. The Art and Craft Store website is designed to showcase and sell unique handmade items. This platform allows users to register, authenticate, and list their art for sale.

Key features:

- **Filter Options:** Allow users to filter art pieces based on customization status such as "Yes", "No"
- **Edit and Update:** Users can easily edit the details of their uploaded art pieces, including title, description, price, category, and images.

Technology Used : React.js, Javascript, TailwindCSS, node.js, Express.js, MongoDB

❖ **Health Hub** [Live side](#) [Client side](#) [Server side](#)

Overview:

The project is a comprehensive web application for managing medical test appointments, including user authentication, profile management, appointment booking, and admin management features. The application provides a user-friendly interface for patients to book and view medical test appointments, manage their profiles, and access test results. An admin panel allows for managing users, tests, banners, and reservations.

Key features:

- **Appointment Booking:** Browse and schedule medical tests, view and manage appointments, with options to cancel or reschedule,
- **Test Management:** The admin can Add, update, remove tests, and manage availability schedules.

Technology Used: React.js, Javascript, TailwindCSS, node.js, Express.js, MongoDB
